Mr. Craw alleges that the two areas marked 40 acres are instead 34 acres. He also contents that we are including roads, property not being irrigated, and some portion of the Connor property. The roads, Connor property and the area marked 'out' on Mr. Craw's map have never been included in his total acreage. They were never digitized into polygons. The road that travels along the half pivot is approximately 3.0 acres.

The two portions that we had as 40 acres each has been changed to 34 acres each which total 68 instead of 80. The half pivot excluding the 3.0 ac. road registers as 125 acres rather than 128. Sixty-eight and 125 plus the disallowed portion of 46.10 brings the total to 239.10 acres. With the temporary change Mr. Craw has a legal right to 209.90 acres leaving him with 29.20 acres that are disallowed.
